

How To:

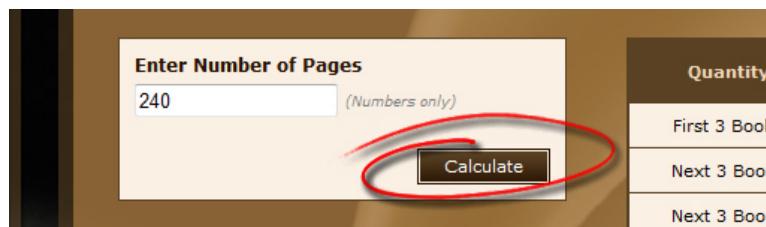

Calculate Your Printing Cost

One of the great features about TheBookPatch.com is that there is no hidden, or extra, charges when we print your books. The prices that you will see listed in the wholesale price chart on our calculator page is the price that you will pay*. No set up fees. No minimum order to get a good price, order as little as one book. With our accumulative pricing structure your printing costs will go down with each order.

1. Move your cursor over the Help menu button, click the **Print Calculator** menu item

2. On the Book Price Calculator page, enter the total number of pages your book has (this includes the title page(s), copyright page, table of contents (if applicable), blank page(s), etc.). *The number of pages must be an even number; if your book ends on an odd number of pages add one more page.*
3. Click the **Calculate** button

4. Your costs will be displayed in the chart to the right of the page.

A screenshot of the wholesale price chart. The chart has two columns: 'Quantity' and 'Wholesale Price (each)*'. The data is as follows:

Quantity	Wholesale Price (each)*
First 3 Books	\$15.50
Next 3 Books	\$12.50
Next 3 Books	\$10.50
All Books Thereafter	\$6.50
500+ (in one order)	\$5.45

*Plus tax (where applicable) and shipping/handling.
